

TIME is MONEY

Rapid Screed Binder

BOTAMENT® M 56 Speed

Rapid Screed Ready-to-use Mortar

BOTAMENT® M 56 Speed^{FM}

Properties:

- Ready to receive covering after 4 hours
- Ideal for time-critical construction sites
- Strongly hydrophobic (high protection against moisture penetration from the rear)
- For interior and exterior use
- On the basis of high-quality CEM I-cement
- Shrinkage and stress-minimized curing
- Can be pumped

Application areas:

to produce the following types of cement screeds quickly ready to be covered:

- screeds on separating layers
 - composite screeds
 - screeds on insulation layers
 - heated screeds
- for use in wetrooms
- to repair and restore existing cement screeds
- to repair cement-based substrates prior to installation
- to set floor anchorings and fence posts

8:00 am - 10:00 pm
- apply base bonded floor screed for the clearance with BOTAMENT M 56 Speed FM
- Face: 5 m², Layer thickness: 30 mm

10:00 am - 14:00 pm
- holding time (4-hours)

14:00 - 16:00 pm
- apply floortiles into the adhesive bed made of BOTAMENT M 10 Speed
- Finestone ware 30 x 60 cm

16:00 pm Grouting (e.g. with MULTIFUGE!)

17:00 pm Closing time!
